yo g'day guys what is going on youtube today i'm going to show you guys how to get free tiktok followers in 2021 guys this is i'm in april right now as of recording this um but this is working as a 2021 a method on how to get free tick tock followers let's go ahead and refresh let me show you guys sometimes um tick tock will be weird and not show you followers like that but as you guys can see i'm getting followers added to my account literally doing this method so i'm going to show you guys how to do this and you're going to get literally thousands and thousands of followers on tiktok for free um you can also get likes you can also get video views um but i just did this before and they're already starting to add as you guys can see one minute ago two minutes ago three minutes ago six minutes ago and if i just keep refreshing that i'm still gonna keep getting these followers so yes this is working and i'm gonna show you guys how to actually get this um i've done this up to like 9 000 followers so yes it does work um and yeah let's get let's go ahead and i'm going to show you guys how to do this and what to do so first of all guys hit the little three dots up at the top and go to privacy and just make sure your account is not private so guys if you have a private tick tock account.

they won't be able to follow you so um don't make sure your account is not private has to be open most people's accounts are open so that's good just wanted to make sure um you guys do this just in case anyone messaged me and saying it didn't work um that is probably why you also want to go down until you see tick code and you want to make sure you have a tick code so um if you go in here and it says unavailable you won't be able to do this this is actually how they follow you um like once i said again this is default so you should have this you should see like your display picture and your name um and it's like a qr code thing so that should be all good um go back you also want to go down to cache um and just clear it so this will just clear um all like save data and stuff like that don't worry it keeps everything the same it just it just clears the app out and makes it run faster and lets you get those followers um in so once you've done that that should be good we can then go um start going to the website let's just double check see how i mean now sometimes the accounts um will not show it's weird but you are getting the followers look trust me it works following following following and i'm just kidding keep on getting more and more um because i just did this just before so let's go ahead and show you guys now if you're an iphone there are some more settings as well so let's go over to settings um if you're on android don't really worry about this um so go to settings on your phone and then go to general scroll down until you see background app refresh and just make sure background app refresh is turned on guys so if this is turned on you're gonna be able to do this it's gonna allow you to send the followers to your account.

all right once you've done that that should be all good we can then simply head over to google and i'm going to show you guys or safari and i'm going to show you guys the website um or whatever where you get it from so what you guys want to do is go to the top up here and type in tick t i k famous so f a m o u s like that dot com so type that like that so nice and easy tick famous go like that and this is the site where they're going to send it to you for free so it's going to should look like this guys tick famous nice so once you're there it's going to say get free followers your tick tock account so what you want to do is just type in your own tick tock account name so don't type in mine but type in your account so we'll go like that so it reminds ryan ticktocky let's go connect and it's gonna start to connect as you guys can see connecting connecting and now you just select how many folders you want now this this might take like a couple days to get or send them all through um but you will eventually get them so to get another thousand here why not and should just start loading getting me my thousand followers and we should be almost done here this is on the tick famous site guys remember tick famous but yeah it's gonna keep loading this little thing wait till this bar to finish you guys will see this yourself but keep keep going along should be almost done um scroll down and you should see the little thing here it says this little red thing just go ahead and click on that and you're gonna have to do this one thing to actually get these followers in.
